

Preparing for Counter-IED Mission in Somalia

Case Study

Experts in logistics and procurement

Dynasafe MineTech, a worldwide provider of land mine and Unexploded Ordnance (UXO) clearance, turned to Agility when it needed to mobilise rapidly in support of the international peacekeeping mission in Somalia. With years of experience in Somalia and Kenya, Agility DGS procured a range of hard-to-find equipment and goods essential to Dynasafe's ability to stand up its team. Agility DGS coordinated delivery of material for housing, working with Dynasafe to design, build, move and install accommodations for the first members of the Dynasafe team. Agility DGS also helped install kenneling facilities for explosives detection dogs, and secured approval for and construction of armoured vehicles, in addition to locating classroom facilities in Mogadishu. Dynasafe's own timeline was advanced by its client. Agility DGS helped Dynasafe start operations just six weeks after initial scoping.

Our Work in Africa

Agility DGS provides logistics and operational support in any environment. It has worked in every country in Africa, providing supply chain services, freight forwarding, warehousing, inventory management, distribution, procurement, disposal, fuels management, remote camp construction and management, project logistics and other logistics services.
