Team of Experts

Freight Forwarding

Agility's purchasing power and partnerships with some of the world's premier carriers, allow us to offer unmatched pricing and preferred status, ensuring that your needs are met rapidly, whether in Mexico or in Europe. With direct access to all Swiss airports as well as our consolidation hub in Frankfurt, your cargo will not only arrive in the right place at the right time – it will be handled properly every step of the way. Agility optimizes costs throughout the whole supply chain for the key Mexican market.

Agility Connects Visibility solution offers real-time freight forwarding shipment tracking and status via browser or mobile app. In addition, reports and data extracts are available anytime. You can also book shipments online saving time and improving data accuracy. Our container optimization tool helps to increase your supply chain efficiency.

Project Logistics

Agility's project logistics experts provide innovative solutions and creative routing options. This ensures smooth delivery to emerging markets without the infrastructure necessary to handle the enormous weight and volume of project cargoes. Agility Mexico is a leader in turnkey transportation and project management and services for large-scale initiatives. Moving machinery, finished goods, factories, and production lines are core competencies of our dedicated teams.
