Agility PCC

With its Pharma Competence Centre (PCC), Agility has brought together a centralized team focused on the unique needs of the healthcare and life science industry. We have 40 years of experience in this industry in Switzerland and offer comprehensive cool chain solutions across all modes of transport. Our specialists handle more than 20,000 temperature controlled shipments per year and provide bespoke solutions.

Agility PCC offers a temperature monitoring service with all shipments. We supply, prepare and activate the temperature monitor, and our team of experts will pack it with your shipment. All temperature monitors offer instant temperature read out via USB download. Easily accessible online tracking enables us to provide our customers with full visibility of their temperature controlled and sensitive shipments.

The trained and certified team, dedicated to life science customers, uses only approved and qualified suppliers to ensure GDP compliance.

Quality is our mission. The PCC is GDP certified and our integrated Quality, Health, Safety and Environmental (QHSE) Management System allows us to measure clear performance objectives at the operations level and ensure best-in-class service.

Bespoke solutions for

- Highly critical API's
- Biotech and biosimilars
