About Agility

Agility Abu Dhabi is a leader in Oil & Gas logistics, Contract logistics and customs clearance services. Some of the region's major Oil & Gas projects depend on Agility for logistics solutions, as do the agriculture, chemicals, defense and healthcare industries. With 200,000 sqm of open yard storage in Abu Dhabi's logistics park, customers and fleet operations alike benefit from premier contract logistics services. Beyond the open yard storage capacity, 21,000sqm are available for closed ambient and temperature-controlled warehousing. Agility's fleet of more than 465 transport vehicles easily handles all containerized, non-containerized, heavy and oversized cargo. Within Abu Dhabi, Agility holds a preferred status with customs. This allows Agility to serve freight forwarding customers with benefits like duty-free exemptions, digital paperwork processes and lower tariffs on goods coming to and from Khalifa Port to Abu Dhabi and Mussafah.

Services

- Freight forwarding (air, ocean, road)
- Warehousing & distribution
- Cross-border trucking
- Customs clearance
- Project logistics
- Chemical logistics
- Fairs & events logistics
- Contract Logistics

Customer Examples

Managing the logistics behind 40% of inbound container volume at Abu Dhabi Port terminals

For five years, Agility has been helping manage logistics for the UAE's largest agricultural company, which provides 40% of all inbound container volume at Abu Dhabi Port Terminals. At peak seasonal times, the Agility team operates with up to 100 people, including a key account manager, operations experts and coordinators, customs clearance specialists, accountants and truck drivers. Operations are managed through tracking, monitoring and reporting systems like an In-Vehicle Monitoring System (IVMS), an automated delivery reporting system and an Inventory Management Systems (Exceed WMS). These systems allow us to ensure that deliveries arrive on time, containers flow smoothly through clearance and delivery, all operations are fully compliant with QHSE standards (ISO) and that there are few incidents of demurrage, mishandled or misdelivered containers.

Expertise in heavy lift cargo will help move 750,000 barrels of oil a day

The upper Zakum offshore field is in the Arabian Gulf, 84 kilometers from Abu Dhabi. A major oil developer has launched a program to drill and transport oil from the field with a target of 750 MBD (thousands of barrels a day). The developer wants to sustain that rate for at least 25 years and recover 70% of proven reserves. Four new artificial islands are being constructed for the project. That's a lot of oil and equipment to move; fortunately, Agility specializes in heavy lift cargo! We'll provide storage, complex freight forwarding solutions by road, sea, rail and air, as well as executing documentation, handling and consolidation of shipments.

100% stock accuracy helps electrical firm handle multiple brands

A manufacturer and distributor of electrical equipment and lighting needed help managing 11 different brands with several SKU(s) per product, per brand. And it had dozens of stores in the market. Agility brought warehousing and distribution solutions that resulted in 100% stock accuracy and transparency. We offered space in an environment-controlled facility in Mussafah; a fleet of vehicles for distribution; and custom-tailored scheduling, inventory reporting and full integration of warehouse data. The company saved on capital expenditures for its warehousing needs, and our logistics solutions addressed its full spectrum of needs, from customs clearance and distribution to storage.
