About Agility

Agility Bahrain is a leader in contract logistics, road freight services and brokerage solutions. Within Bahrain, Agility is a leading end-to-end contract logistics provider with comprehensive brokerage capabilities, transport services and warehousing located close to air and seaports. Agility's warehousing footprint includes 28,000 sqm of space with temperature-controlled solutions. Operating with a fleet of owned assets and proven experience, Agility Bahrain manages a comprehensive road freight service. Committed to serving customers' needs, Agility offers reefer transport for temperature-sensitive items and uses transport management systems to optimize visibility into shipments. Employing 13 licensed brokers, Agility is Bahrain's largest brokerage provider. Branches within close proximity to the airport, seaport and causeway are responsible for more than 10,000 full trailer loads annually.

Services

- Freight Forwarding (air, ocean, road)
- Warehousing & Distribution
- Cross-Border Trucking
- Customs Clearance
- Project Logistics
- Fairs & Events Logistics
- Chemical Logistics
- Contract Logistics

Customer Examples

Warehousing investments help customer manage production targets, lead times

When a grocery manufacturing and processing customer established a green field manufacturing plant in Bahrain as part of its expansion plan, Agility made investments to show our level of commitment. Agility built additional warehousing facilities in Bahrain and expanded our transportation fleet to support the customer's increased production. To minimize production stoppages at the plant, Agility tailored its warehouse operations to meet the customer's specific manufacturing and transportation requirements, as well as re-engineered the supply chain to better manage inventories of raw materials through to the finished product. As a result, the customer was able to meet its production volume targets and respond to fluctuating market demand while optimizing transportation lead times in the Gulf Cooperation Council (GCC) region, especially when sales built up during the pre-Ramadan period.

Customs and distribution expertise helps multinational move high-value goods

A global leading multinational company was seeking a partner in the Middle East to assist with distribution. Due to the high-value nature of the company's goods, it was imperative to find a distribution partner who could provide tight security and visibility into cargo as it was moved. Agility was the right partner to provide distribution from a customs bonded hub and manage inbound customs clearance of finished goods from factories in Switzerland and Turkey. We also used Agility-owned trucks moving in secured convoys and with third-party security through certain trade lanes to protect the goods. Agility's expertise helped the customer overcome customs hurdles, distribution security challenges and cargo storage.
