Customer Example

Helping a global sports giant get its goods to the U.S. and Europe

A world-renowned sports brand requires us to meet and exceed demanding supply chain requirements. We share a never-give-up attitude that has made Agility one of the few logistics providers entrusted to manage its global supply chain to the U.S. and Europe. Agility operates an airfreight de-consolidation center in Belgium at Brussels Airport and handles products from China, Hong Kong, Thailand, Vietnam, Indonesia and Pakistan. Goods in transit must be monitored 24/7 to ensure a 99 percent on-time delivery performance, and that's why our WMS enables full visibility from the cargo in transit to the SKU level. We also load the customer's delivery trucks and organize direct deliveries.
