- Fairs & Events Logistics
- Chemical Logistics
- Customs Broker

## Customer Examples

### **Integral services for an important oil and gas supplier**

Agility Colombia's Project Logistics division has designed and developed an integrated logistics solution according to an oil and gas customer's need for electrostatic theater equipment (550 CBM/70 tons) used for an effective method of crude oil extraction. Within its control tower planning framework, Agility complied with the customer's expectations in reference to delivery timelines, appropriate cargo-handling and costs from all the suppliers within the logistics chain.

### **Value-added services for production plant moved from Colombia to Mexico**

Our personalized advice and flexibility with value-added services gave us the opportunity to solve a major challenge for a production plant moving its location from Colombia to Mexico. Not only did we integrate the logistics services in both countries, but we also differentiated our service by providing engineering, disassembly and reassembly, as well as assuring the correct functionality of equipment at the destination country.

### **Integrated supply chain solutions for Colombian freight forwarding industry**

Agility Colombia offers Purchase Order management services as a strategic solution for retail companies in Colombia. This improves companies' visibility into their supply chains, as well as cash flow optimization and cost reductions to maintain their competitiveness in the market.
