About Agility

Agility Egypt is a leader in contract logistics, freight forwarding and customs brokerage. A state-of-the-art warehouse located in 6th of October City has 60,000 pallet positions and 67 loading docks with onsite handling capabilities to relocate goods. Throughout Egypt, Agility offers 43,000 sqm of warehousing and 35,000 sqm of open yard storage. Time-sensitive cargo is in good hands with Agility, which operates across four locations in Egypt and offers online cargo tracking for overland, air and sea freight shipments. With a port of call license putting Agility at equal status as shipping agencies, customers can depend on Agility to manage the complex regulations around freight forwarding. Agility serves its customers with customs clearance at all Egyptian ports and at dedicated branches with more than 20 brokers and outsourced firms. These brokerage teams are able to create SOP and SLA for customers' specifications; get clearance at bonded warehouses, dry ports and free zones; and lead market studies in customs.

- Air Freight
- Ocean Freight
- Road Freight
- Warehousing & Distribution
- Customs Clearance
- Project Logistics
- Chemical Logistics
- Fairs & Events Logistics

Customer Examples

Fast, modern logistics solutions help retailer open new store for peak shopping season

A famous UK-based international retailer needed to open its first store in Egypt before Christmas. Agility was tapped as the retailer's logistics supplier and charged with delivering a modern solution to the store's operation. Working under extreme time constraints, Agility established a dedicated 1,200 sqm dust-free area within a 43,000 sqm warehouse in Egypt to manage the flow of all inbound and outbound goods. Agility carried out daily distributions to the store and provided customized services, such as a temperature-controlled area for cosmetics storage and specialty solutions for hanging garments. Agility's commitment to meeting its customer's expectations meant the store could commence operations in time for the holiday rush – and benefit from the huge sales potential during peak shopping season.

Improving operations for global food and beverage giant

One of the world's largest food and beverage companies was considering ways to improve its supply chain. Recognizing that the physical storage of its products is a vital component within the supply chain, the company saw value in integrating its supply chain processes and systems with a best-in-class 3PL partner. Agility Egypt became that partner, handling all dry warehousing activities and confectionery operations. As a result, the customer reaped many benefits, including a 25% productivity increase per head, reduction in working days from 7 to 6, safer work environment with no fatalities, the unloading of nearly 540 finished goods containers and 1,200 raw material containers/month, and the loading of up to 18,000 customer orders dispatched from 7,200 trucks/month.
