## About Agility

Agility Singapore offers customers their support in the optimization of supply chains by using forward-looking technology and leveraging multimodal freight capabilities: air, ocean, domestic and cross-border trucking. Agility's value added services, not limited to light assembly, configuration and bundling/kitting, are deployed across various market verticals – pharma & life science, consumer goods, retail and hi-tech sectors.

## Services

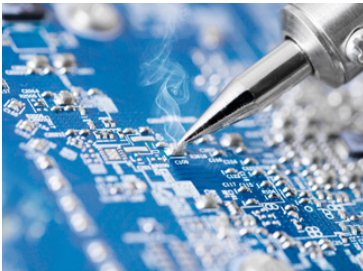

- Air Freight
- Ocean Freight
- Road Freight
- Road-Rail Service to Europe
- Contract Logistics
- Fairs & Events Logistics
- Project Logistics

## Customer Examples

### **Servicing fast food giant with 1,700 pallet positions across 1,000+ SKUs**

A global fast food company needed a reliable domestic supply chain for its 157 stores in Singapore. Agility's logistics expertise in food and beverage allowed us to reduce their costs, shorten order lead time and ensure order fulfillment, and provide an unbroken cold chain for storage and distribution. Using a world-recognized food safety management system, Agility services the restaurants with 1,700 pallet positions across 1,000+ SKUs.

### **Evolving a tech company with logistics schemes and complementary services**

When a US-based tech company sourced for a distribution hub in close proximity to their Malaysia factory that will allow them to leverage on Singapore's transportation connectivity to their target global market, they needed logistics help. As a non-registered trading company in Singapore, the company looked to Agility to act as importer/exporter on its behalf. Agility also provided value-added services, with inventory management, kitting and light assembly.
