About Agility

Agility Spain offers contract, project, fairs & events and oil & gas logistics. Four of Agility's warehouses offer customs clearance and three are customs bonded to assist customers with deferral duties and taxes. Agility serves industries looking for complex project management and transportation support for their most ambitious endeavors. Industries like automotive and life sciences depend on Agility for customs knowledge and expertise in product launches.

Services

- Air Freight
- Ocean Freight
- Road Freight
- Contract Logistics
- Project Logistics
- Fairs & Events Logistics
- Chemical Logistics
- Customs Clearance

Customer Examples

Consolidating pharma products creates 30% savings

A global pharmaceutical company based in Germany faces many regulatory and logistical challenges distributing products from eight European countries: Austria, France, Germany, Italy, the Netherlands, Spain, Switzerland and the UK. Its products require controlled-room temperature and cold chain transportation. Complying with EU regulations for Good Distribution Practices (GDP) can drive up shipping costs, impact profit margins and complicate an already complex distribution process. This company needed a centrally controlled system to ship products within 24 to 48 hours. Agility's Life Sciences industry and freight forwarding expertise generated direct and indirect savings of up to 30% by creating an LTL road freight solution. Agility dedicated a 24/7 customer desk with constant GPS tracking, enabling full transparency and GDP compliance.

Managing more than 1,350 global exhibitors at ITMA

The International Exhibition of Textile Machinery (ITMA) is the industry's largest and most prestigious event, held every four years. Agility Fairs & Events is the official onsite logistics provider and has managed the ITMA Asia exhibitions in Singapore and the ITMA global exhibition in Barcelona. Agility's expertise in managing large-scale global events was put to good use in delivering first-class solutions to more than 1,350 exhibitors from 45 countries that showcased and demonstrated their latest technological products and innovative solutions on the massive 200,000 square meter show floor at ITMA. Agility's strong global network and proven reliability were instrumental in bringing together the entire contingent of exhibitors and their exhibits.

Handling massive retail chain's air and ocean volume, even in emergency

Agility manages the high-volume, global supply chain of a Spanish multinational clothing retailer. We ship to 5,500 stores worldwide from 11 sites in four countries, and export to four countries with more than 300 suppliers. That amounts to 14,000 tons of air volume and 120,000 cubic meters of ocean volume moved in one year! Our consolidation center in Colombo, Sri Lanka handles cargo from India and Bangladesh into Argentina and Brazil. Back-to-back charter transport allows us to maintain an unbroken supply chain even in emergencies, like the volcanic ash incident that shut down airspace in Europe. Beyond emergencies, we offer deferred transit time service for Spain that cuts airfreight costs by 20%. Agility's technology applications ensure that stores are refreshed each week with new styles, no matter what.
