

Pharma & Life Science Capabilities

Market Solution India

Challenges of managing temperature sensitive products in India

The global Life Science sector is continuously growing with emerging markets offering numerous opportunities. Many global pharmaceutical companies have a wide base of contract manufacturers (CMOs) in India. Besides extreme temperature and humidity conditions at origin and in transit, complex Government and Customs requirements and an increased focus on Good Distribution Practices are some of the main challenges.

Although standards and regulations are improving globally and will strengthen pharmaceutical supply chain integrity, major changes will take time. How can pharmaceutical manufacturers bridge the gap between these global supply chain challenges and increasingly personalized patient therapies?

Agility's Life Science solution for the Indian market

The in-depth understanding of the customer requirements as well as of local challenges combined with our willingness to invest have allowed us to create a solution that answered the specific requirements of the pharmaceutical industry by providing a range of services, including: storage in multiple temperature zones, cold chain solutions, reverse logistics, and advanced tracking and tracing technologies which ensure total supply chain visibility and reporting on merchandise flows across all modes of transport.

Agility's expertise in India include just in time multiple markets access for highly time sensitive Product Launches. We create visibility & control on global flows by implementing Control Tower Concept of Operations. We optimize costs while ensuring product quality and temperature control with innovative LCL consolidation services.

The Agility Life Science solution for the Indian market reduces costs, minimize risks and ensure product integrity by offering better insight into supply chain flows.

Services designed for the Indian market

- Pharma Competence Centre in Mumbai, India
- GDP compliant Air, Ocean, Road Freight transportation
- Experienced in Product Launches
- Control Tower Concept of Operations
- Weekly Ocean console India to Europe & US via GDP certified facility at Nhava-Sheva, India
- CHA & Dangerous goods certified
- C-TPAT compliant offices and vehicles for collection & distribution
- Active & passive packaging solutions
- ISO 9001:2008; 18001:2007; 14001:2004 certified
- IATA member
