## About Agility

Agility Turkey is strategically located to serve not only its local customers but also its global customers with freight forwarding. Turkey connects markets across East and West – Asia and Europe – for a total of 1.6 billion-population reach within four hours of air travel. Tech-forward and freight forwarding services like advanced track and trace technologies serve customers from a wide variety of industries. An exceptional project logistics team assists with solutions for oversized and out-of-gauge cargo transit.

## Services

- Freight forwarding (air, ocean, road)
- Warehousing & distribution
- Cross-border trucking
- Project logistics
- Chemical logistics

## Customer Examples

### Shipping oversized goods with precision and expertise

Agility is an expert in handling oversized goods, but shipping 30 airplanes and three large containers of spare parts to Karachi, Pakistan, was a unique challenge. Each aircraft had different dimensions, so Agility worked with a carpenter to prepare a cradle for each plane's unique size before packing it. The challenges didn't stop there: The shipment required seaworthy lashing, and nothing could be loaded with cranes due to the sensitivity of the planes' wings. Therefore, all packing and lashing equipment was custom-designed and made by Agility staff. The Agility team and additional hired staff had to work with specially designed trolleys and use manpower to load the wings into the custom crates. The entire shipment took three months to complete and was shipped in two installments. When the shipment reached its destination, everything was on time and intact, earning praise from the customer.

### Expert forwarding forecasting guarantees on-time delivery for VIP cargo

When a major auto manufacturer needed to move four VIP vans for a government ceremony from Turkey to Poti, Georgia, Agility stepped in with expert advice. Three other forwarders recommended sea/RORO in their quotes; however, Agility's experienced team knew that method would not meet the deadline. Agility spent two days in detailed discussions with the customer and ultimately shipped the vans via road freight with exceptional lashing on tented trucks. The vans arrived in time for the ceremony, and the customer was appreciative of Agility's service and dedication to their time-sensitive shipment.

### Meeting delivery deadlines - even for delayed cargo - with Agility-wide collaboration

When a Turkish customer's freight forwarder delivered the disappointing news that their Australian event-bound cargo would arrive one week after the event's closing date, Agility took over the doomed job. Two large containers were loaded with custom-designed stands for 10 separate exhibitors. Fairs & Events teams from Agility Turkey, Malaysia and Australia collaborated to get the cargo back on schedule. The teams worked together on transshipment, customs clearance and container transport to deliver the entire load by the customer's deadline.
