Class 8		<p>◆ "KEEP APART" - Separate packages by at least 3m.</p> <p>◆ "SEGREGATE FROM" - These combinations should not be kept in the same building compartment or outdoor storage compound.</p> <p>◆ "SEGREGATE FROM" or "KEEP APART" - The latter standard refers to the outside storage of gas cylinders. Where non-liquefied flammable gases are concerned, the 3m separation distance may be reduced to 1m.</p> <p>◆ "ISOLATE" - Dedicated buildings are recommended, alternatively some peroxides may be stored outside in fire-resisting secure cabinets.</p> <p>◆ "SEPERATION MAY NOT BE NECESSARY" - In particular, note some types of chemicals within the same class, particularly Class 8 corrosives, may react violently, generate a lot of heat if mixed or evolve toxic fumes.</p>																																																																																																																																																			
Class 9		Please use this hazard chart as a guide and refer to the current international dangerous goods regulations for full compliance.																																																																																																																																																			

## Questions? Concerns?
